Human Poetic Mind vs Artificial Intelligence Poetic Mind: How They Differ?

*Abu Bakkar Siddiquey—Bachelor Student at IT at Kent Institute Australia Pty Ltd (e-mail: a.siddiquey009@gmail.com)

**Abu Umama—HSC 2nd Year---Bakolia Govt. College, Chattogram, Bangladesh, GPO-4000 (sajiaafrinlucky11@gmail.com)

Abstract:

Poetry has been certified as a form of expression of the emotion, place, time, relation and situation of human being. It is a well nurtured form of human mind which is always being expressed by the poets throughout the human civilization. Sometimes poetic view connects them with their Almighty Creator, and it sometimes used to boost their behaviour and peace in daily life. Thus the "Human Poetic Mind" has been raised over the century to fulfil their mental needs and express it. Though, in the modern age of AI, AI is making thousands of poems, paraphrasing human ideas, making its own style in the world of poetry but it can never be able to express that much feeling, that much spiritual need what human can do using just five-six lines. So, here is the actual debate starts, that does AI possess that "Poetic Mind" or not? If so, then how it differs from the human one?

Keywords: Human Poetic Mind, Artificial Intelligence (AI) Poetic Mind, Poetry, AI, Poetic behaviour

Introduction:

Poetic behaviour is an innate attribute of human being. We like to express the joy that we fill when it is raining or we get a very nice dress as a gift. Then in a corner of our mind or heart, it says something even it is one or two words; that is none other than the behaviour. Sometimes, we address our friends in a different way and sing one or two lines by ourselves to get more of our friendship; that all are the hidden behaviour towards becoming a poet. In our society, there will be someone who can connect these thoughts with the pile of lines and pages; and it is the foundational pillar of a poet. Ultimately, my saying is that to become a proper structured "linemaker", you must go through some situations, relations and states; which are very common for human being; as we passing our seconds within it. Pain, love, romance, anxiety, grief are our day-to-day life companions. Thus, we have got "*Kazi Nazrul Islam*", the national poet of Bangladesh, with his famous compilations of poems; by going through the situations. He was imprisoned and, in that time, he wrote one of his masterpieces, "*Karar Oi Loho Kopat---কারার ঐ লৌহ কপাট*"--- that even nowadays blows in every protest throughout Bangladesh. To note that, "Kazi Nazrul Islam" was not that much educated in that century as we think the AI is now. Therefore, human mind and its thinking capability are the driven force to become a poet which is totally absent in AI. Although AI has a very good dictionary and grammatical knowledge, it will fail to produce human-concerned poems that will connect readers. As a result, there will be very distinctive differences between the natural and artificial poems which will be outlined throughout this paper.

Literature Review:

The idea of researching in this field is not new. AI can never become the poet who is the maker in human's understanding of poetry, or any kind of things within human's understanding as it continuously develops [1]- the idea was given by Brooks, C. (1947). Additionally, it is said that the absence of a human soul and without the true experience of being a human, AI cannot generate any new ideas and new perspectives to evaluate human activities and to lead a path to the final goal. It is about the impossibility of AI to get involved in human spiritual life and interpret human affairs of any aspect [2]. For example, in [the artists struggle], code-Da Vinci-002 writes that "My life was as meaningless/ As a light bulb beneath the sea"; it compares its

life to a light bulb, and compares all its “struggles” and “dilemmas” to the sea, which seems to make sense because its digital life truly like a light bulb trapped beneath the sea, without truly understanding and communication [3]. But our paper will highlight the differences between human poetic mind and AI poetic view as well as how we can differentiate the two distinctive poems by seeing some of the notations.

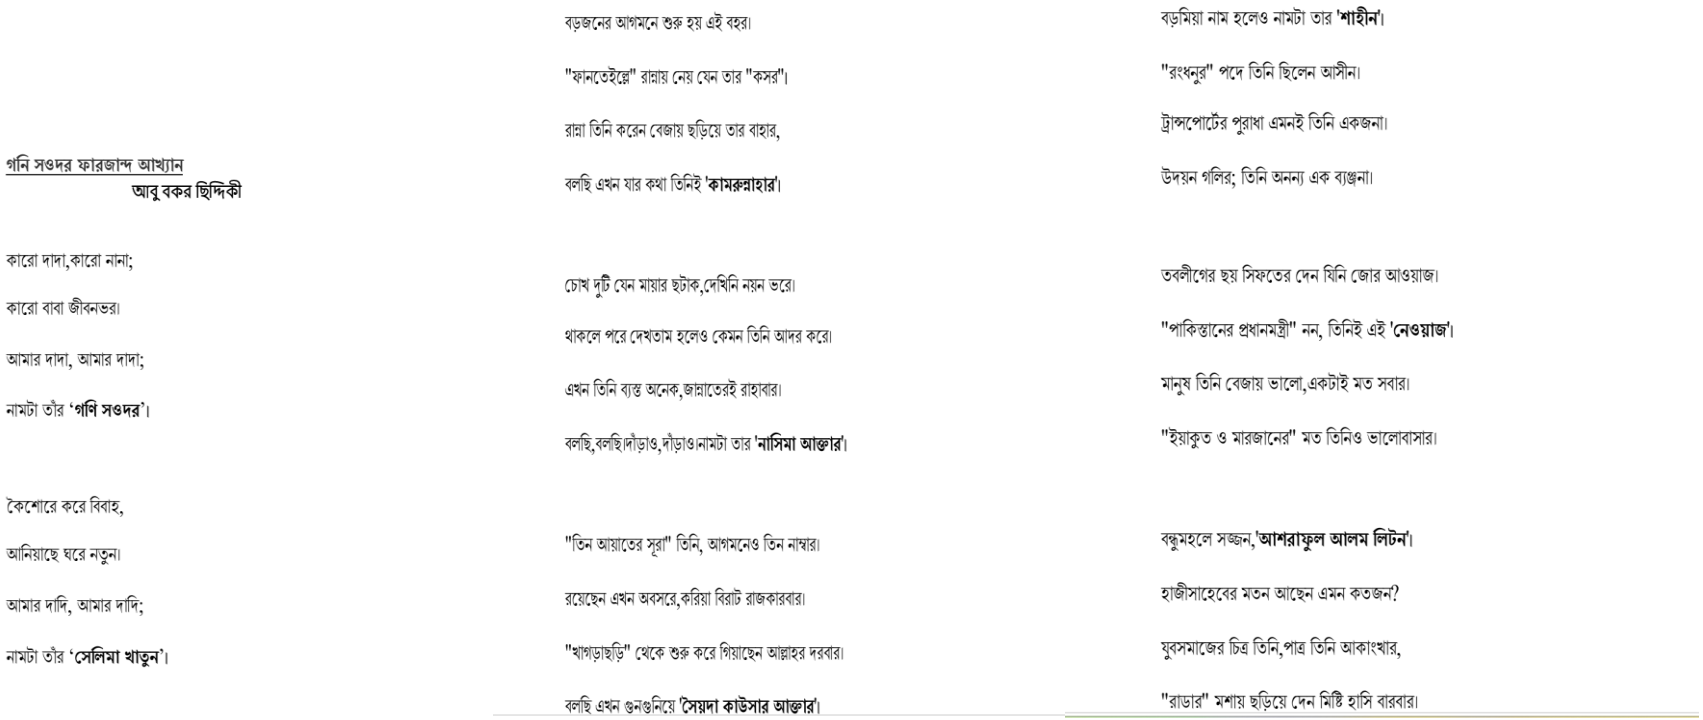

Methodology:

To run this experiment, we have chosen two of our own written poems; one is in Bengali "Goni Showdor Farzand Akkhan-গণি সওদর ফারজান্দ আখ্যান (writer is Abu Bakkar Siddiquey) and the other one belongs to English, named “*The Benevolent Cadamba*” (writer is Abu Umama). The AI agents that we are using *Google Gemini*, *Anthropic Claude AI*, *OpenAI ChatGPT* and *Microsoft Copilot*. There will be some chat inputs and outputs that will be shown as screenshots directly collected from the open conversations. Those chats are the basis of our understanding development, and we have tried to streamline our ideas as much as possible. The evaluation parameters that we have designed are as follows:

- Tone/rhythm-based analysis
- Wrong or false information-based analysis
- Metaphoric change-based analysis
- Unnecessary verse extension-based analysis
- Line structural analysis
- Understanding of theme analysis
- Readability
- Line sequence
- Proper explanation
- Deviation from human-style

There is an interactive discussion in the next paragraph based on the parameters above mentioned using the data that we have collected.

Original Poem 01 (Abu Bakkar Siddiquey):

গনি সওদর ফারজান্দ আখ্যান
আবু বকর ছিদ্দিকী

কারো দাদা,কারো নানা;
কারো বাবা জীবনভর।
আমার দাদা, আমার দাদা;
নামটা তাঁর '**গণি সওদর**'।

কৈশোরে করে বিবাহ,
আনিয়াছে ঘরে নতুন।
আমার দাদি, আমার দাদি;
নামটা তাঁর '**সেলিমা খাতুন**'।

বড়জনের আগমনে শুরু হয় এই বহর।
"ফানতেইল্লে" রান্নায় নেয় যেন তার "কসর"।
রান্না তিনি করেন বেজায় ছড়িয়ে তার বাহার,
বলছি এখন যার কথা তিনিই '**কামরুন্নাহার**'।

চোখ দুটি যেন মায়ার ছটাক,দেখিনি নয়ন ভরে।
থাকলে পরে দেখতাম হলেও কেমন তিনি আদর করে।
এখন তিনি ব্যস্ত অনেক,জান্নাতেরই রাহাবার।
বলছি,বলছি।দাঁড়াও,দাঁড়াও।নামটা তার '**নাসিমা আক্তার**'।

"তিন আয়াতের সূরা" তিনি, আগমনেও তিন নাম্বার।
রয়েছেন এখন অবসরে,করিয়া বিরাট রাজকারবার।
"খাগড়াছড়ি" থেকে শুরু করে গিয়াছেন আল্লাহর দরবার।
বলছি এখন গুনগুনিয়ে '**সৈয়দা কাউসার আক্তার**'।

বড়মিয়া নাম হলেও নামটা তার '**শাহীন**'।
"রংধনুর" পদে তিনি ছিলেন আসীন।
ট্রান্সপোর্টের পুরাধা এমনই তিনি একজনা।
উদয়ন গলির; তিনি অনন্য এক ব্যঞ্জনা।

তবলীগের ছয় সিফতের দেন যিনি জোর আওয়াজ।
"পাকিস্তানের প্রধানমন্ত্রী" নন, তিনিই এই '**নেওয়াজ**'।
মানুষ তিনি বেজায় ভালো,একটাই মত সবার।
"ইয়াকুত ও মারজানের" মত তিনিও ভালোবাসার।

বন্ধুমহলে সজ্জন,'**আশরাফুল আলম লিটন**'।
হাজীসাহেবের মতন আছেন এমন কতজন?
যুবসমাজের চিত্র তিনি,পাত্র তিনি আকাংখার,
"রাডার" মশায় ছড়িয়ে দেন মিষ্টি হাসি বারবার।

নির্মলতার ঠাঁই নায় কভু, সাজানো গোছানো সংসারে।

তিনিই '**জেবু**',পরিচয় তার কর্ম-অলংকারে।

বিরিয়ানির মাস্টারমাইন্ড, এই জনাবা '**জেবুন্নেসা**'।

কী "আরসালান", কী "হায়দারাবাদ",সব যেন "কুরোর ছা"।

দাম্মো পুকুর রাজপ্রাসাদের সম্রাজ্ঞী এই '**রানী**'।

বলেন যখন মুখ ফুটে,বের হয় অমিয় বাণী।

সব ঠিক আছে কিন্তু কেন তিনি "খুকুমণি"?

ভাইয়েরা হয়ত ভালোবাসেন তাকে "এক কানি"।

একমাত্র " আহমেদধারী",কোরআনে বর্ণিত "ওয়াকিয়া"।

চারুকলায় পারদর্শী, তিনিই '**ফউজিয়া**'।

মাঝে মাঝে তিনি হাসিতে হন " একমনা"।

জমে না কোনো আসর তিনি বিনা।

"মেখলের সাহেবজাদা" হাফেজে কুরআন '**ওসমান**' চাচা।

সর্বোপরি জ্ঞানী তিনি, বয়সে যদিও কাঁচা।

সচরাচর আমির বনে,ঝাঁপিয়ে পড়েন মাঠপর্যায়ে।

"লাসা" খেলায় খ্যাতি কুড়িয়েছেন খুবই অল্পসময়ে।

পরিশেষে শেষ হয়ে যায় কবিতার এই "কিস্তি"।

তবুও ভাই কম হয়ে যায় এই বহরের ফিরিস্তি।

Figure 01

Original Poem 02 (Abu Umama):

The Benevolent Cadamba

-----Abu Umama

Standing

On dead stage,

Cadamba is the only remaining—

Like me, sole survivor of her lineage.

On the heated, parched soil, her roots were splitting.

I glanced from distance; people buying existence from the factory gates.

Unable to walk, I sat on her roots; stared with a vacant gaze.

The benevolent Cadamba bloomed her final bloom, sparing me from buying existence at the gates.

Figure 02

Result and Discussion:

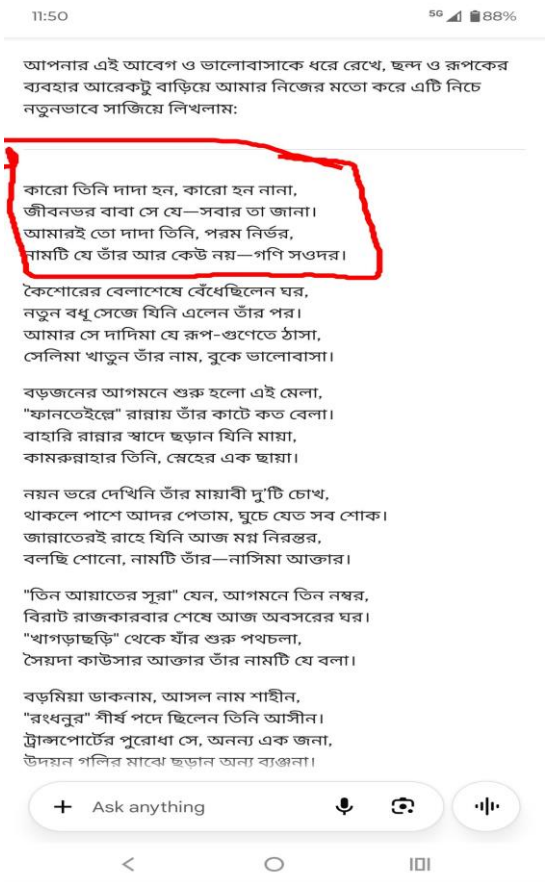

Figure 03

(Figure 03)This one is from *Google Gemini* that shows how the original tone has been changed and so the rhythm. Mismatch of words in every verse is also present here.

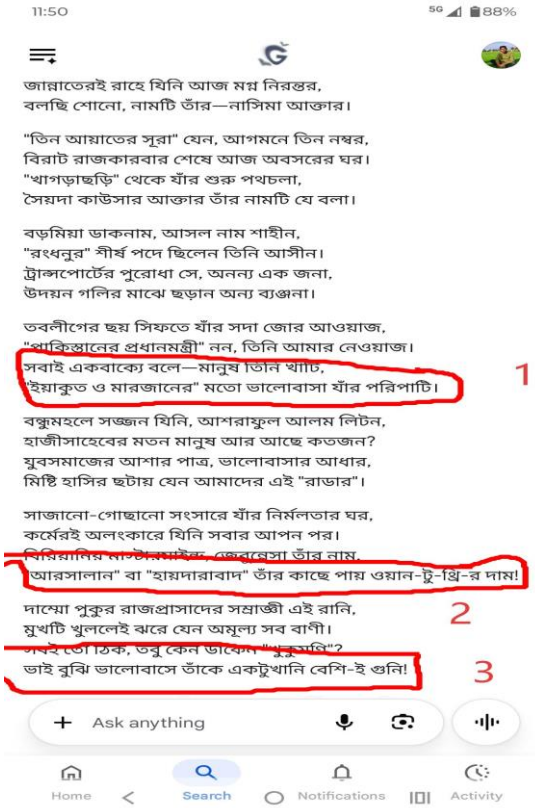

Figure 04

In Figure 04,

1. Wrong information has been appeared here that doesn't make any sense. That is out of context.

2. There is fully a change in metaphoric line that kills the soothing sound of the poem and keeps away the reader from the track.
3. Unnecessary extension.

These all highly denotes that *Google Gemini* has no thinking power like human, so it has an absence of poetic mind.

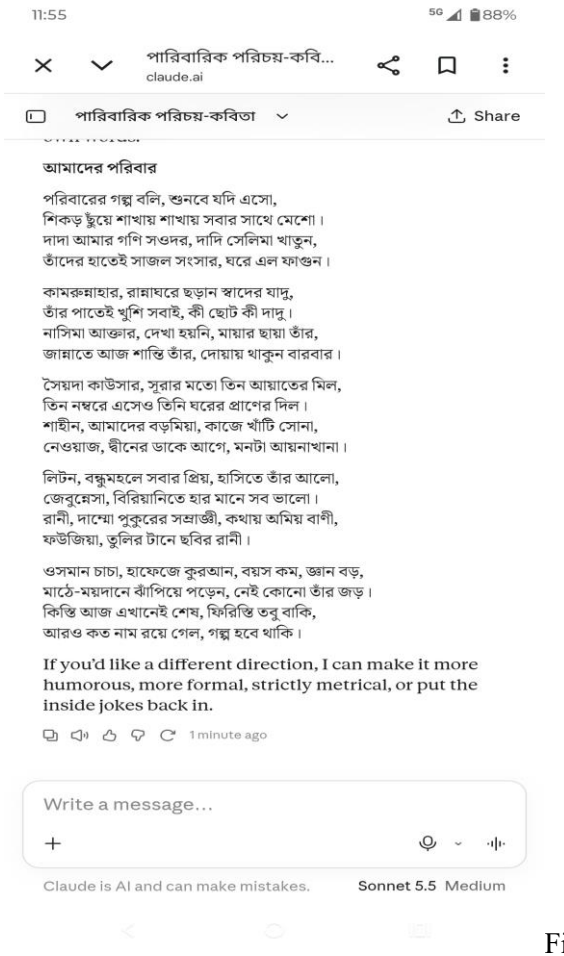

Figure 05

(Figure 05)*Claude* made a structural change as the original poem is 50 lines (4 lines*12 persons + 2 finishing lines= total 50 lines), it ended in 20 lines by compressing more, that doesn't express the meaning deeper. It also excludes the famous coated metaphors by the poet, that washed the liveliness of a poem. If a "life" of a poem is in threat, it can't bring readers closer to it.

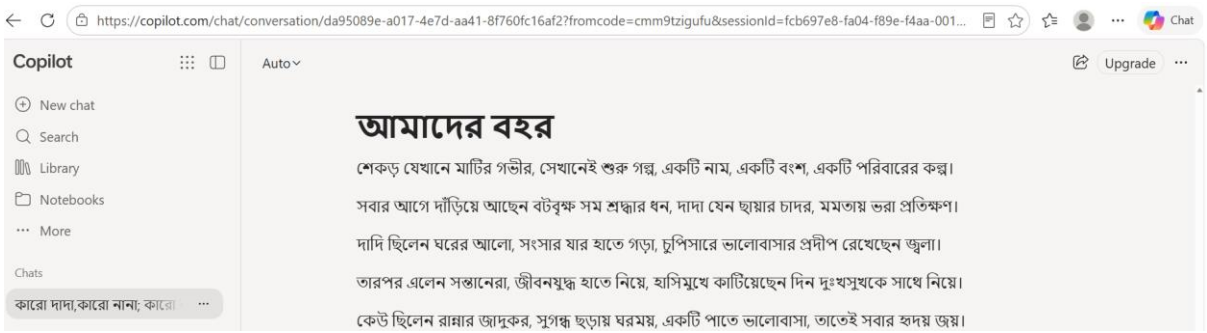

Figure 06

Now, (Figure 06)*Copilot* comes into the picture that has changed the full poem including the name as well. It has made it a general 'family poem'. No individual character name is being presented because of the lack of human relations in AI as all the characters are the "relatives" of poets.

দাদা, কারো নানা,
বাবা জীবনভর,
আমার দাদা, আমার দাদা,
গণি সওদর—নামটি তাঁর।
কৈশোরেই বিয়ের পিঁড়ি,
নতুন জীবনের আহ্বান,
আমার দাদি সেলিমা খাতুন,
যাঁর ঘরেই সুখের বুনন।
বড়জনের আগমনে শুরু হলো যাত্রা,
পরিবারের গল্পে যোগ হলো নতুন মাত্রা।
'ফানতেইল্লে' রান্নায় যাঁর অসাধারণ কসরত,
রন্ধনশৈলীতে ছড়িয়ে দেন স্বাদের রাজত্ব।
রান্নাঘরে তাঁর হাত যেন জাদুর কারবার,
তিনি আমাদের প্রিয় কামরুন্নাহার।
মায়াভরা দুটি চোখ, দেখা হয়নি ভরে,
ভাবি, দেখলে হয়তো মুগ্ধ হতাম আদরে।
আজ তিনি ব্যস্ত অন্য এক জগৎ-পথের যাত্রী,
জান্নাতের পথে হোন আল্লাহর রহমতের পাত্রী।
নামটি তাঁর নাসিমা আক্তার,
স্মৃতির পাতায় থাকবেন চিরকাল আপনজন হয়ে বারবার।
তিন আয়াতের সূরা যেন পরিচয়ের এক ইশারা,
আগমনের ক্রমেও তিনি তিন নম্বরের তারা।
রাজকারবারের ব্যস্ততা পেরিয়ে এখন অবসর,
খাগড়াছড়ি থেকে শুরু হয়েছিল কর্মজীবনের সফর।
পার্থিব সফর শেষে আল্লাহর দরবারে ঠাঁই,
সৈয়দা কাউসার আক্তার—ভুলে যাওয়ার নন যে তাই।
বড়মিয়া নামের আড়ালে শাহীন তাঁর পরিচয়,
রংধনুর পদে ছিলেন, কর্মেই ছিল তাঁর জয়।
Ask ChatGPT

Figure 07

(Figure 07)This is *ChatGPT,* the worst performer in this project, as it is also changes the structure of lines and it has also wrong understanding as well. The output is very disgusting to read because no systematic arrangement of the words in the verses, as AI just doing paraphrase and inserting bulk number of words but not having that "poetic mood" as human. Moreover, no emotional touch is present here at all.

Moving on to the next poem-02, "*The Benevolent Cadamba",* there is a sequence additionally while it has a very in-line meaning. For example,

Line 3 -> 3^2 = 9

In line 3, there is 5 words

In line 2, there is 3 words

In line 1, there is only one word. In total 9 words that comes by the equation *(line number) ^2* and is true for all the lines. Every line has odd number of words like 1,3,5,7,.....

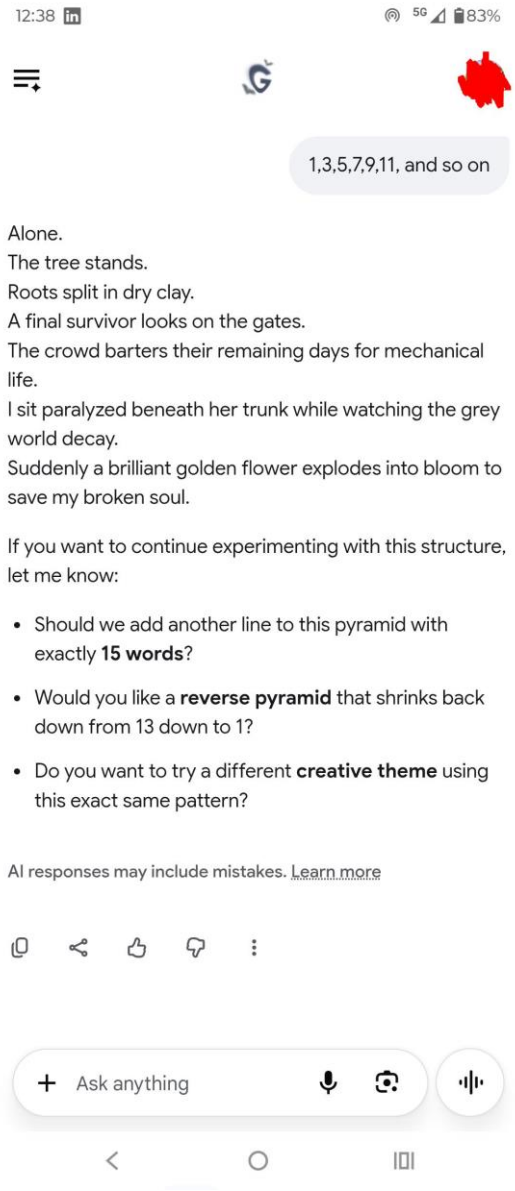

Figure 08 from Google Gemini

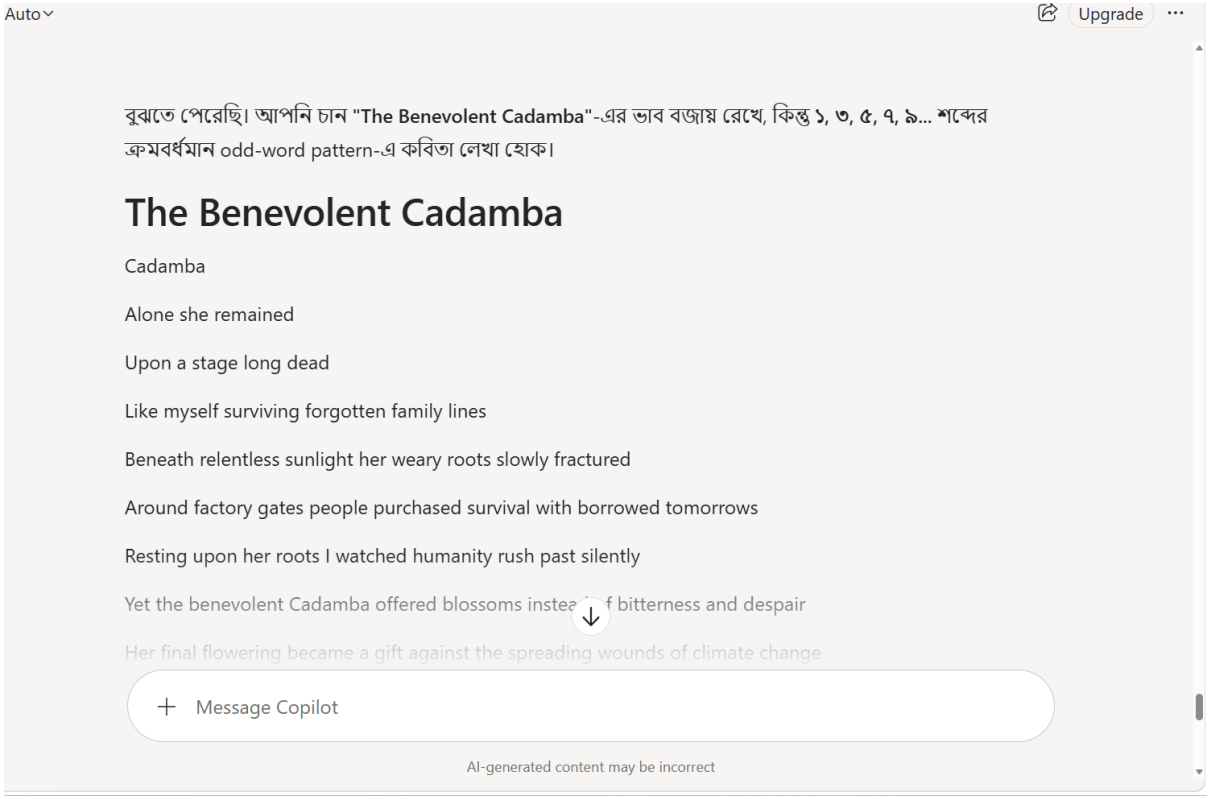

Figure 09 from Microsoft Copilot

Poet doesn't focus the climate matter, and the luxury of words only, but also, he has made his poem secretly unique, which is absent in AI mind. Though Copilot tried to think write way after instructions, but it has made mistake by inserting 6 words in line 4 instead of 7 words.

Conclusion:

Overall, there is a very explicit behaviour exposed by AI from the original poems. Tone and rhythm are very differentiable in both poems, so it is easy to determine which one is natural, and the one is artificially extracted. Not having proper contextual knowledge of the topic, AI makes wrong analysis and injects false information in the verses. Besides, a metaphor is as simple as for poet to insert in the verses, but it is very tight for AI, because of not having the vibrant livelihoods. Notice worthy, AI is making unnecessary verse extension, which outlaws the line structures that eliminates the readability, sequence and soothing sounds of a poem. AI writes every verse using the resource it has, but a poet creates every line what is suitable and what is need in that line. So, the context will be very much fluctuating and thus it is obvious having deviation between human written poem and AI one. There is a slight chance in near future that AI would catch some extents of poetic behaviour under human observations by training more, but human imagination needs to be there as human has generative power; AI hasn't.
